Trusted by Leading Organizations

Novti is proud to be the chosen partner for over 25 successful organizations, helping them achieve their conversion goals.

The Nonprofit Fundraising Problem

Nonprofits lose significant revenue daily due to outdated donation flows, technical barriers, and lack of visibility into donor behavior.

Revenue Leaks in Donation Forms

Slow, confusing, outdated donation flows cause donors to abandon before completing their gift.

Developer Dependency

Teams cannot test or optimize because every change requires developers or expensive agency support.

Broken CRM Integrations

CRM connections break or require costly custom work, creating data silos and manual processes.

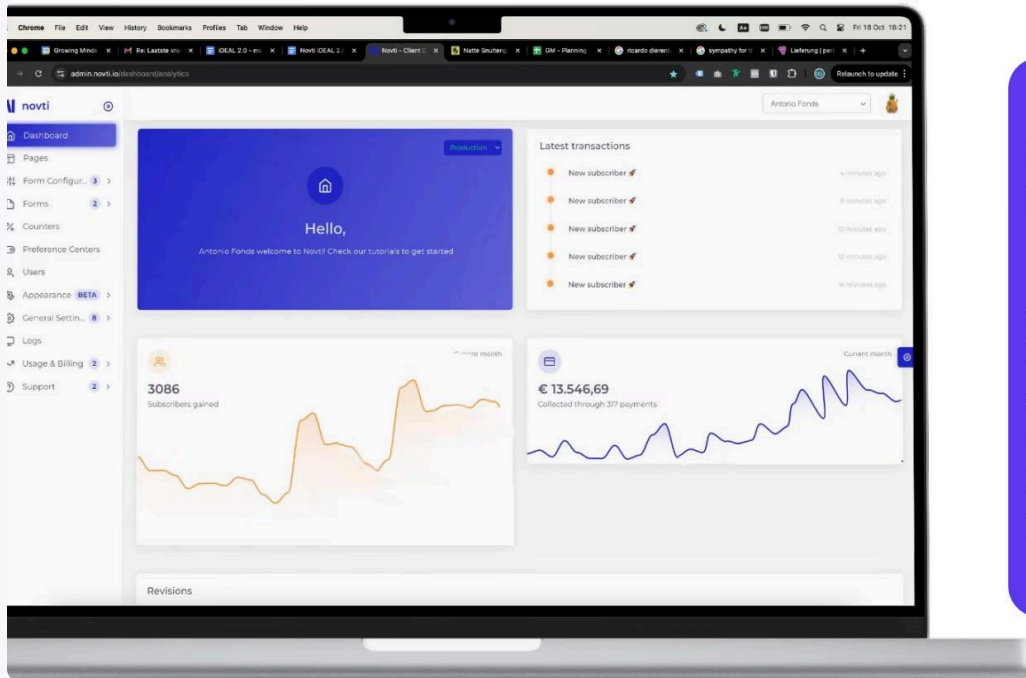

Invisible Donor Behavior

Internal teams cannot see why donors drop off, making optimization impossible without guesswork.

Novti's Solution: Proven Results for Nonprofits

Novti removes technical barriers and delivers measurable impact—helping nonprofits increase donation conversions, empower their teams, and keep donor data clean.

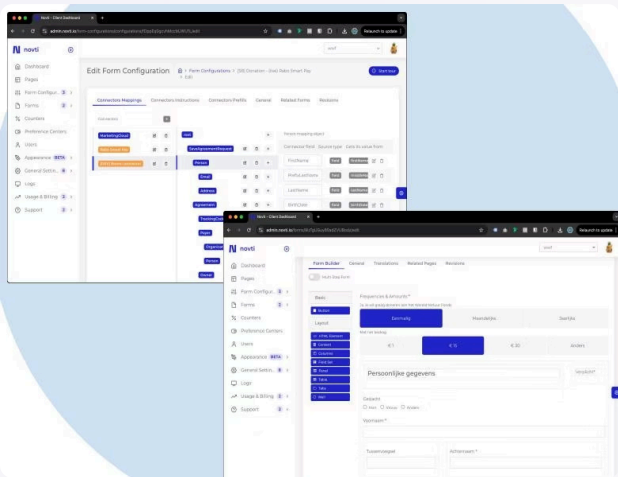

- **+18–35%** conversion rate increase on donation forms
- Build & launch campaigns in minutes, no developers needed
- Personalised flows that adapt to donor profiles
- A/B test donation amounts, layouts, and messaging
- Automatically sync clean donor data to your CRM

BESCHERM HET AMAZONEWOUD

De Braziliaanse regering wil het Amazonewoud opofferen voor het snelle geld. Dat kunnen we niet laten gebeuren. De Amazone is cruciaal in de strijd tegen klimaatverandering. We moeten NU handelen.

Jouw donatie maakt dit mogelijk:

- Onderzoek naar ontbossing en naar de bedrijven die er verantwoordelijk voor zijn;
- Internationale bedrijven die betrokken zijn bij de ontbossing (publiekelijk) ter verantwoording roepen;
- De lokale bevolking trainen in het gebruik van drones en smartphones. Zodat zij ontbossing in hun gebied beter kunnen documenteren en aankaarten bij de rechter;
- Gedurfde wereldwijde acties voeren om alle ogen op de Amazone te vestigen;
- Politici ter verantwoording roepen voor bescherming van het regenwoud en ons klimaat.
